- Functional, regression, and exploratory testing (web & mobile)
- Test case design, execution, and defect tracking
- Automated testing using Selenium WebDriver/ServiceNow ATF
- API testing with Postman
- Test management and bug tracking using Jira

Tools & Tech Stack

Jira, Git, Postman, Java, Node.js, JavaScript, MongoDB, NoSQL, Bitbucket, QA, Confluence, Agile/Scrum, Code Review, Pull Requests, SourceTree, Docker, GitHub, Objective-C, HTML, CSS, React, Angular, React Native, Android Studio, Xcode, REST APIs, Ngrok, Selenium

HOBBIES

A favorite subject?
The city of Montreal and which means of transport to choose to go from point A to B optimally.

Arts
In all its forms: exhibitions, museums, circus, music, theater, drag, etc.)

Sports
Squash & Balle Molle

PROFESSIONAL EXPERIENCE

02/2021 - 10/2025

mPhase — Montréal

QA Analyst & Software Developer

Product development, implementation, and testing of a web platform and its associated applications used by more than 10,000 users.

Jira, Postman, Git, MongoDB, NoSQL, Agile/Scrum, REST APIs, JavaScript, Node.js, Java, Angular, Android Studio, Xcode, Rigueur, Souci du détail, Esprit d'analyse

> *Quality assurance has always been one of my core strengths, as I proactively anticipate issues and ensure high-quality deliverables from the early stages of development.*

> *At mPhase, I worked within a team of 10 developers in an Agile/Scrum environment with time-boxed sprints, utilizing a CI/CD pipeline (GitHub Actions, Sentry), and conducting code reviews and branch checkouts for every pull request.*

Main tasks:

- Requirements analysis, defect management, documentation updates and quality assurance of digital products:
  - Performed daily **regression testing** during branch checkouts.
  - **Proactive identification of risks** and **recommendation of solutions** to ensure high-quality deliverables.
  - Executed **manual and automated testing** on both complete and partial features.
  - Used **simulators via Android Studio and Xcode** to validate features across various configurations in Android and iOS environments.
  - Performed **unit testing** on REST APIs (Node.js) using **Postman** and **Ngrok**.
  - Creation of **test data** and validation of functionalities.
- **Developed and implemented** new features in Front-End and Mobile.
- Data querying and **analysis using MongoDB**, with fundamental knowledge of **NoSQL**.
- Involvement in daily meetings to **ensure proper tracking of ongoing projects**.

Key features:

- Internal communication module
- Internal forms (disciplinary and technical forms)
- Automatic vehicle departures and arrivals based on speed and location
- Overview of upcoming routes for drivers
- Improvements to mobile app UI and UX
- Display of recent changes to routes, etc...

02/2018 - 09/2019
